

OMRON campaign 2020

Do you have an old Hydraulic Power Unit from Skarpenord?

Is this HPU equipped with OMRON control cabinet?

- Skarpenord is no longer able to supply parts and support to the old OMRON cabinets - and the new OMRON system is not compatible with the old system without a very expensive re-build.
- Skarpenord has a SOLUTION for this problem and can supply a completely NEW control cabinet with Beijer PLC, to replace the old one.
- The new cabinet is standardized with a touch panel at the front door. We can also supply an optional touch panel to be installed in Control room.

The new cabinet is delivered completely programmed with all necessary parts for exchange:

- Complete programmed panel with alarm system and touch panel at front door
 - Optional touch panel to be installed externally.
(Please inform if old system consists also of remote panel.)
- New level / temperature sensor compliant with the new PLC
- Complete set of necessary cables to connect New mounting plate to fit the replacement cabinet to the HPU
- New warranty on changed parts - according to enclosed Sales Conditions
